PIX-LawnMaster® (Lawn & Garden Belts)

PIX-Lawn & Garden Belts are specially engineered to endure the most demanding working conditions presented by grass machinery in uneven lawns and toughest of terrains.

Special features:

- Best-of-class Aramid cord Belts, designed for superior resistance to shock loads
- Specially woven bare-back outer cover fabric for high wear resistance, enhanced flexibility and smooth clutching operation
- Extensive range of special construction Belts designed to meet specific mower applications

PIX-Lawn & Garden Belts are expertly produced using technology and materials of the highest standard to provide exceptional reliability and performance in the most challenging drive conditions. They are characterised with physical properties such as high tensile strength, non-extensibility, high power transmission capacity, high wear-resistance and reverse bend flexibility.

PIX-LawnMaster® Aramid-corded, Bare-back Lawn Mower Wrap Belts

Features

- The Aramid cords offer high tensile strength, high resistance to shock loads, and minimum elongation
- Specially designed bare fabric facilitates smooth clutching operation and high resistance to wear and tear
- Able to withstand high levels of reverse flexing
- Resistance to oil, heat, and cracking
- Temperature range: -18°C to +80°C

Constructional details

1. Specially insulated rubber compound offers superior adhesion
2. Specially treated Aramid cords for high tensile strength
3. Fibre-loaded compression rubber base compound for enhanced power transmission
4. Special bare-back fabric outer cover for the smooth clutching operation

Product range:

DCBU-5L	16.7	9.7	40	21	180	inch	La

PIX-Enforcer®-XS

High-duty, Aramid-corded, Inversely Flexible Wrap Belts

Features

- Superior power transmission capacity over standard Belts
- Specially treated outer fabric cover for high wear resistance
- Specially coated Aramid cords for enhanced adhesive strength and minimum elongation
- Unique design in wrap construction to facilitate smooth operation over smaller diameter pulleys with an acute reverse bend
- High performance under variable load conditions and the drives with reverse idlers
- Longer service life
- Extended temperature range: -25°C to + 100°C

Constructional details

1. Special top fabric layer
2. Cushion rubber
3. Especially treated Aramid tensile member for superior strength and low stretch
4. High modulus rubber base compound
5. Multi-layer fabric provides extra strength, also act as a crack barrier over applications where reverse bending is involved

PIX-Duo®-XS
Twin-power, Hexagonal Wrap Belts

Features

- Enhanced product life
- Transmits power from both sides of the Belt
- Center cord provides excellent power transmission and low-stretch
- Special design provides excellent flexibility for serpentine drives
- Temperature range: -30°C to +80°C

Constructional details

1. Wear-resistant bias-cut neoprene rubberised polyester cotton fabric
2. High tenacity, low stretch tension member
3. High modulus compression rubber

PIX-X'tra®-XP/XL/ML

Raw Edge, Multi-layer Fabric Laminated Belts

Features

- High power transmission capacity than standard Belts.
- Superior transverse stiffness and high wear-resistant.
- Multi-layered bottom fabric, to restrict the formation of cracks and supports application involving acute reverse bend.
- Anti-static, oil and heat resistant
- Suitable for application with back idlers
- Temperature range: -25°C to +100°C

Constructional details

1. Special top fabric layer
2. Specially treated and stabilised polyester cords
3. Fibre-filled base compound
4. Multi-layer fabric provides extra strength and act as a crack barrier in reverse bend conditions

PIX-Spectra® -XR

Centre-corded, Inversely Flexible Raw Edge Laminated Belts

Features

- High power rating compared to standard Wrap Belts
- High tensile strength
- Improved flexibility, suitable for back idler applications
- Longer service life
- Temperature range: -25 °C to +100 °C

Constructional details

1. Multi-layer fabric provides extra strength and acts as a crack barrier under reverse bend conditions
2. High modulus polyester cords placed at the center to neutralise the reverse bending stress
3. Specially compounded rubber for better grip over smaller diameter pulleys
4. Unique design offers laminated side-walls, which supports high power transmission and accelerates the heat dissipation rate

Twisted drive

PIX-Thermal[®]-XC
High-temperature Poly-V Belts

Features

- High power transmission capacity
- Suitable for small diameter pulleys
- Maximum Belt linear speed up to 60 m/sec
- Extended service life
- High temperature resistant from -35°C to +130°C

Constructional details

1. Specially designed top fabric for enhanced lateral stiffness and flexibility, protects the Belt from oil, grease and dust
2. EPDM Polyester tension member for minimal elongation, facilitating maintenance-free drive
3. Fibre-loaded EPDM compression rubber offers high thermal resistance and enhanced dimensional stability

PIX-PolyStretch®-XC Elasticated Moulded Poly-V Belts

Features

- Low noise levels
- Self-tensioning property maintains the Belt tension through its life
- Enhanced power transmission because of optimum contact area
- Easy installation
- Increased service life
- Moulded Belts offer superior dimensional stability
- Temperature range: -25° to +100°C

Constructional details

1. Top special rubber design for enhanced lateral stiffness and flexibility. It protects the Belt from external agents such as oil, grease, dust, etc.
2. Specially designed Polyamide tension member for ease of installation and maintaining maintain uniform tension throughout the Belt
3. High abrasion and thermal resistance rubber compound, supports retaining the Belt profile over

PIX-X'act® Timing / Synchronous Belts

Features

- High efficiency due to positive engagement between the Belt teeth and pulley grooves
- Fibre-glass cords provide excellent strength, flex life and high resistance to elongation
- Exact power transmission
- Low noise levels and longer service life
- Improved stress distribution
- Temperature range: -25°C to +100°C

Constructional details

PIX-TorquePlus®-XT2 High-power Timing Belts

Features

- 50% to 70% enhancement in power-rating over PIX-X'act® HTD/STD Belts
- Higher angular speed, resistance to loads and low noise
- Optimum operational efficiency and augmented Belt life
- Lower operational cost
- Anti-static properties as per ISO 9563
- Oil and heat resistance
- Temperature range: -25°C to +100°C

Constructional details

1. Specially designed flexible neoprene compound offers high resistance to fatigue and adverse environmental conditions
2. Fibre glass cords for enhanced stability against dynamic load conditions, high resistance to elongation, offers excellent flex life and high tensile strength
3. High modulus teeth rubber for superior power transmission and high resistance to oil and heat
4. Specially woven fabric, resistant to heat and

Features

- Facilitates power transmission from both sides of the Belt
- Highly flexible
- Extended stability, durability, strength and life
- Temperature range: -25°C to +100°C

Constructional details

1. High wear-resistant nylon stretchable fabric provides strength to teeth profile
2. Centre corded, specially treated glass cords for high strength and negligible elongation
3. Fibre-loaded compression rubber for dimensional stability, to minimize the noise/abrasion, protects the teeth from damage
